SUMMARY

I am a Full Stack Junior Software Developer with a Bachelor's degree in Computer Science from the University of the Philippines Los Baños. I have hands-on experience in full stack application development and a strong programming foundation in Python, C, Java, and JavaScript. My interests include software development and system architecture.

SKILLS

Java	Mobile Development	Communicates Effectively
Java Script	Web Development	Good Interpersonal Skill
Python	System Architecture	Work-oriented with good work ethics

PROFESSIONAL EXPERIENCE

TimeFree Innovations, Inc.

June 2023 - August 2023

- Developed web applications using AngularJS, focusing on dynamic and responsive user interfaces.
 - Contributed to the frontend development of an ongoing team project by implementing UI features and improving user experience using AngularJS.
- Gained foundational knowledge in cybersecurity through participation in online training programs, enhancing awareness in data protection.

Software Ventures International

October 2024 - Present

- Completed comprehensive training in Java Programming, Concurrency, Frontend Development, Web Servers, Cassandra DB design and PowerBI. Built and deployed multiple personal projects as training requirement:
 - Frontend Development (Vanilla JS): [Tictactoe Game](#)
 - Java Concurrency Project: [Concurrency](#)
 - RESTful Web Service in Java: [Web Service](#)
- Developed automation tools using Java to streamline business workflows and reduce manual tasks.
 - Built java batch tools for processing and organizing business-critical documents, improving efficiency in document handling.
- Created custom Python scripts for automation and data transformation tasks.
 - Enabled seamless integration between systems by converting and generating data across various file formats.
- Designed and implemented Java-based REST endpoints for backend service integration and data exchange.
 - Contributed to backend development as part of a team in an ongoing project, focusing on server-side logic and database handling.

- Handled Cassandra database operations, including schema design, data modeling, indexing, and query optimization.
- Utilized Docker to containerize applications and manage consistent deployment environments across development and production.
- Conducted bug fixing and debugging in web applications using JavaScript, HTML, and CSS.
 - Identified and resolved frontend issues using browser dev tools and editor-based debugging during the QA and post-deployment phases.
- Contributed to system architecture design, transitioning monolithic applications into scalable microservices.
 - Utilized modern frameworks such as Spring Boot and Kafka to build event-driven architectures.
 - Optimized Cassandra database schemas for performance and scalability.
 - Implemented observability stacks to enhance system monitoring, logging, and reliability.

ACADEMIC EXPERIENCE

Undergraduate Capstone Project

CMSC 190: Special Topics (AY. 2023-2024)

- **Project Title:** *eLICOM: A Pre-Enrollment System for Libon Community College, Libon, Albay*
- Developed as a solo undergraduate capstone project to address and streamline the student pre-enrollment process.
- Built using the MERN stack: ReactJS (frontend), ExpressJS (backend), and MySQL (database).
- Implemented user authentication, course selection, and admin-side management features to simulate real-world enrollment workflows.
- Demonstrated full-cycle development—from system analysis and design to deployment and documentation.
- Source Code:
 - Frontend: [GitHub – elicom-client](#)
 - Backend: [GitHub – elicom-server](#)
- Documentation: [Special Problem Manuscript](#)

OOP Project: Space Warrior

CMSC 22: Object Oriented Programming (AY. 2021-2022)

- Developed a 2D shooting game titled Space Warrior in Java, applying core principles of Object-Oriented Programming (OOP).
- Implemented key gameplay features including a player-controlled shooter, enemy predators, collision detection, scoring system, and power-ups.
- Demonstrated strong understanding of class hierarchies, encapsulation, inheritance, and polymorphism.
- Source Code: [Space Warrior](#)

AI Application Project: TicTacToe

CMSC 170: Intro. to Artificial Intelligence (AY. 2022-2023)

- Developed a Tic-Tac-Toe game in Python featuring an unbeatable AI opponent using the Minimax algorithm.
- Source Code: [TicTacToe](#)

Database Management: SQL Project

CMSC 127: File Processing and Database Systems (AY. 2021-2022)

- Developed a Command-Line To-Do List Application with integrated SQL database functionality to demonstrate practical application of Database Management System (DBMS) concepts.
- Implemented features for task creation, updating, deletion, and storage using structured queries.
- Source Code: [To-Do List](#)

EDUCATION

University of the Philippines Los Baños, Los Baños Laguna

2020-2024

Bachelor of Science in Computer Science

- Cum Laude
- DOST - SEI Academic Excellence Awardee
- Phi Kappa Phi Honor Society Nominee

Ligao National High Schol, Ligao City, Albay

2018-2020

Accountancy, Business and Management

- With High Honors
- Leadership Awardee

ADDITIONAL INFORMATION

- **Languages:** English, Tagalog, Bicol
